

Electronic potentiometer with switch control

5116501

1-10 V control unit

Main Features

> For all power supplies with 1-10V interface for simple light control. If the 1-10 V control inputs of all electronic ballasts in extensive lighting systems are connected to one another and operated by the electronic potentiometer, the whole lighting system can be switched and dimmed centrally.

Specifications

Rated voltage	AC 230 V ~
Control current	max. 50 mA
Ambient temperature	+5 +25 °C
Length	70.7 mm

Width	70.7 mm
Height	32 mm
Connections	Screw terminals
single stranded	1 4 mm²
Switching current for AC 230/240V~ ohmic	6 A
