

instalight Vario interface module PWM

V2 FM PW 001

Interface module PWM

Main Features

- > Interface module for PWM control of LED luminaires via instalight Vario
- > Control of LED applications via up to 4 PWM channels with max. 90 W power each
- > Single colour dimming, Tunable White or RGB/RGBW control possible
- > Suitable for control of versatile LED applications thanks to universal PWM outputs
- > Supply of the PWM channels via external power supply units
- > Operation with instalight Vario basic device

Specifications

Load current per channel	max. 3 A	Controllable channels	2 x A, 2 x B
Rated voltage DC	(external) 12 ... 30 V	Interface	PWM
