

50W Dimmable DALI LED Driver

SOLOdrive 560 is a DALI compatible, constant current LED driver with two LED outputs that are controlled as a single ballast. Dimming is beautiful - smooth all the way down to 0. SOLOdrive is programmable to suit a wide application area. Its two LED outputs offer the possibility of driving a very high power 50W LED array connected to a single output, or driving two strings of 15 LEDs at 350mA. LEDcode allows easy extension of the SOLOdrive's feature set with time, motion and brightness based intelligence.
